

Analysis code	Service description	Quantity	Price (CHF)
<b>Bakt-ID</b>	Identification of bacterial colonies from agar plate by MALDI-TOF MS.	1 - 10	31.00
		11 - 30	24.00
		> 30	18.00
<b>Bakt-ID plus</b>	<p>Isolates that cannot be successfully identified in the Bact-ID (age of the cultures) are subcultured and identified again using MALDI-TOF MS.</p> <p>This additional service will only be charged if necessary, in case of a successful first identification only one Bact-ID will be charged.</p>	1	31.00 + 42.00
<b>Yeast-ID</b>	Identification of yeast colonies from agar plate by MALDI-TOF MS.	1 - 10	42.00
		11 - 30	35.00
		> 30	29.00
<b>Yeast-ID plus</b>	<p>Isolates that cannot be successfully identified in the Yeast-ID (age of the cultures) are subcultured and identified again using MALDI-TOF MS.</p> <p>This additional service will only be charged if necessary, in case of a successful first identification only one Yeast-ID will be charged.</p>	1	42.00 + 53.00
<b>Fungal-ID</b>	Identification of mould colonies from agar plate by MALDI-TOF MS.	1 - 10	42.00
		11 - 30	35.00
		> 30	29.00
<b>Fungal-ID plus</b>	<p>Isolates that cannot be successfully identified in the fungal ID (age of the cultures) are subcultured and identified again using MALDI-TOF MS. This additional service will only be charged if necessary, in case of a successful first identification only one fungal ID will be charged.</p>	1	42.00 + 53.00
<b>Bacillus-cereus-group-ID</b>	Species identification of Bacillus cereus group isolates by MALDI-TOF MS.	1	62.00

Analysis code	Service description	Quantity	Price (CHF)
<b>Listeria screening</b>	Colonies from Listeria selective agar (primary plates) where Listeria isolates can only be identified at genus level, non-Listeria companion flora is identified at species level.	1	31.00
<b>Listeria confirmation</b>	Colonies from Listeria selective agar (secondary plates) are identified at species level. For <i>L. monocytogenes</i> isolates, lineages I-IV are additionally differentiated.	1	62.00
<b>Listeria screening and confirmation</b>	Listeria genus isolates from the Listeria screening are differentiated at the species level using Listeria confirmation. For <i>L. monocytogenes</i> isolates, lineages I-IV are additionally differentiated. This additional service is only charged if required; no Listeria confirmation service is charged for a neagtive Listeria screening analysis.	1	31.00 + 62.00
<b>GKZ Flüssig</b>	Total bacterial count aerobic mesophilic germs, liquid matrix, according to SLMB	1	34.00
<b>GKZ Fest</b>	Total bacterial count aerobic mesophilic germs, solid matrix, according to SLMB.	1	68.00
<b>Legionellen Sampling</b>	Quantitative analysis of Legionella (water) including sampling on site. Identification of all Legionella species by MALDI-TOF MS. <i>L. pneumophila</i> isolates are serotyped (1 or 2-15).	1	182.00
<b>Legionellen KIT</b>	Quantitative analysis of Legionella (water), customer collects sample himself. Identification of all Legionella species by MALDI-TOF MS. <i>L. pneumophila</i> isolates are serotyped (1 or 2-15).	1	88.00
<b>Cell-ID</b>	Identification of eukaryotic cell lines at the species level using MALDI-TOF MS.	1 - 10	74.00
		>10	63.00
<b>Isolation Salmonella</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00

<b>Analysis code</b>	<b>Service description</b>	<b>Quantity</b>	<b>Price (CHF)</b>
<b>Isolation P. aeruginosa</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00
<b>Isolation E.coli/Coliforme</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00
<b>Isolation Listeria</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00
<b>Isolation S. aureus</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00
<b>Isolation C. perfringens</b>	Culture detection using selective agar, matrix solid or liquid, according to ISO.	1	66.00
<b>Luftkeime und Oberflächen</b>	Sampling on site, conditions on request.	-	
<b>16S Sequenzierung</b>	16S sequencing from agar plate, database reconciliation and interpretation.	1	185.00
<b>Cereluid-Food</b>	Detection of cereluid directly from the product.	1	225.00
<b>Cereluid-Kultur</b>	Detection of cereluid directly from culture.	1	62.00
<b>Consulting</b>	MALDI-TOF MS support, hygiene monitoring and source tracing, telephone advice.	per 15 minutes	60.00
<b>Invoice by post</b>		1	2.00
